

WESTON® 3.5" Super Chute Juice Extractor

Fresh Juice in Seconds – The Weston® Super Chute Juice Extractor allows juice enthusiasts to create their own fresh blends at home. Juicing is fast and efficient with the extra-large 3.5-inch chute. The powerful motor makes 16 oz of juice in just seconds. Choose high speed for harder vegetables and fruits, and low speed for soft fruits and leafy greens. Whether you juice a little or a lot, the 34 ounce BPA-free pitcher has a lid for storing, easy to read measurement marks, and a froth separator.

Easy to Clean – This juicer disassembles quickly and most parts simply need a quick rinse. The patented Easy Sweep™ cleaning tool sweeps the strainer clean in one simple motion. A large pulp bin lets you juice more while emptying the bin less. Removable parts are dishwasher safe.

Additional Features – The extra-large 3.5-inch chute virtually eliminates the need for precutting apples, celery and other large fruits and vegetables. Craft your own creations or use the included full-color recipe book for juices, as well as hearty dishes and baked goods made with juice pulp.
